

RYAN JONES

I am an Information Systems major with a business analytics minor, and I plan to work with software in some way after school!

I know basically all Microsoft's software, but I am most proficient in Excel. I use it for school as well as personal use. For example, I use it for my finances.

I am from Livermore, California, born and raised. I grew up playing every sport you can think of and was pretty good at them all. I love getting out and doing anything and everything! I love a good movie and have seen way too many of them, but my favorite must be Interstellar.

I choose UNR because I wanted to get away and move somewhere completely different. I also love the Campus and how close it is to Tahoe. I am excited for this semester because I am training for a Spartan Race at the end.
